

Interests

Computer science

- Typed languages (statically, strongly) (Java, Go, OCaml)
- Data structures
- Databases (transactions, consistency models, scalability)
- Machine learning (theory)

Business

- Investing (portfolio theory, public market, startup)
- Consumer tech & products
 - Platforms (iOS, Android)
 - Delivery & marketplaces (Uber, Airbnb, Instacart, DoorDash)
 - Messaging & social (Messenger, WhatsApp, Snap)
 - Media & entertainment (Netflix, Spotify, YouTube, iTunes, Kindle)
- Enterprise tech (business models, strategy)
- Startup strategy (user acquisition, product-market fit, growth, scaling)
- Technology trends - especially historical (web, mobile, cloud, big data)

Natural sciences

- Math (probability, statistics, linear algebra, calculus, combinatorics; puzzles)
- Physics (mechanics, e&m, quantum, relativity)

Social sciences

- Economics (macro, international)
- Psychology (behavioral)
- Geography (demographic, economic)
- History (post-WWI, U.S., world)

Meta

- Writing
- Mentorship (academic, career)
- Admissions (undergrad, graduate, hiring)
- Decision making (career, life)
